# BURLINGTON MONTHLY STATISTICS PACKAGE OCTOBER 2022

#### **SUMMARY**

Easing sales in October contributed to a year-to-date decline of nearly 27 per cent, making it the slowest level of activity since the late 1990's. While new listings this month did trend down relative to levels reported earlier in the year, so far this year, there has been a boost in new listings, albeit mainly in the higher price segment of the market. Overall, the pullback in sales relative to new listings has contributed to a gain in inventories over last year's record lows, but inventory levels still remain well below traditional levels. Unlike some areas, inventory levels have improved across most price ranges. However, over 50 per cent of the inventory remains priced above \$1,000,000.

For the first time since March, benchmark prices in the region did not trend down relative to the previous month. However, at an October price of \$1,010,600, prices have still eased by 22 per cent from the February high. The benchmark prices remain over 15 per cent higher than they were at the end of 2020.

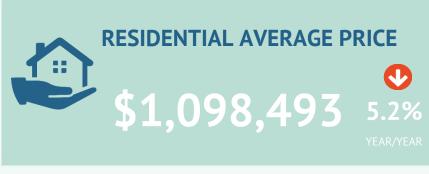

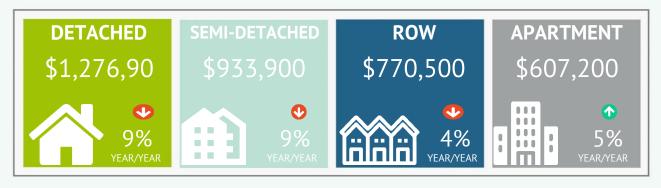

#### **PROPERTY TYPES**

Sales continued to ease across all property types, with year-to-date declines ranging from a high of 30 per cent for row/townhouse-style properties to 23 per cent for detached homes. Meanwhile, new listing growth has mostly been for apartment and detached-style properties. While inventories have improved across all property types, detached inventories still remain well below traditional levels.

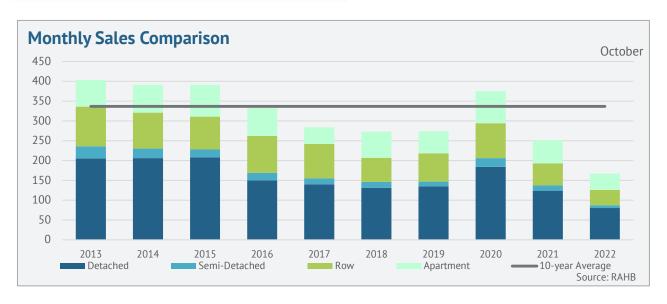

While the monthly decline in benchmark prices took a pause this month for detached and semi-detached prices, prices have trended down by over 20 per cent from the February highs for those property types. Despite the adjustments this year, year-to-date benchmark prices remain higher than last year's levels across all property types, with the most significant gain occurring for apartment-style products.

#### **BENCHMARK PRICE**

#### Burlington Monthly Statistical Report - October 2022

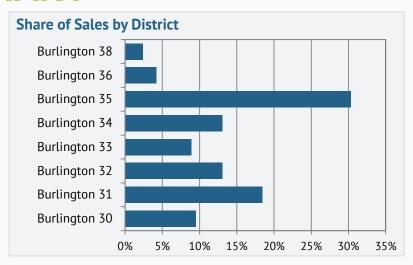

#### **REGIONAL SUMMARY**

While sales have trended down across all areas within the Burlington region, both Burlington 32 and Burlington 35 reported an October month of supply below two months. Both areas saw different levels of listing growth, keeping inventories low relative to sales activity.

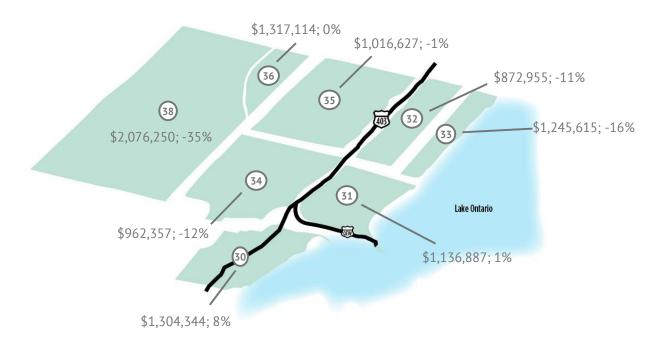

While most regions did see a pause in the monthly decline in prices, all areas within the region have seen prices ease from record highs and are reporting year-over-year price declines in October. Despite the downward pressure in prices, benchmark prices remain well above last year's levels on a year-to-date basis, with the strongest gains reported in the Burlington 35 area.
